

Executive Summary

Introduction

This is a report of the project's progress, contributors, and the steps my team used to create our own repository and extract and analyze data. See graphs below for how the data was represented.

Link to forked repository:

https://github.com/EricPettie/CS472_LABS

Notable Findings

- Active contributors: The most active contributors were Scott Alexander-Bown and Matthew Robbins.
- Recent Activity: In recent weeks there has been increased activity from developers like Scott Alexander-Bown. This suggests he has been fixing bugs or just improving the code.

Workload Analysis

The scatter plot below illustrates the frequency of file touches over time by many different authors.
